

# COVID-19: RETURNING BACK TO WORK AFTER INFECTION

Following parts of the economy opening up while working reduce the infection rate of the coronavirus disease 2019 (COVID-19), proper precautions should be in place for the returning workforce. This includes people who have recovered from COVID-19 infections.

In an effort to educate and create preparedness with individuals and businesses, we share this series of four interviews where Dr Ahmad Haeri Mazanderani speaks about the measures that should be put in place to protect employees from COVID-19 and how their return to work be managed.
